

## **Make your Own Snowshoes from Ready to Lace Frames – just in time for winter!**

Steve Gorg

I have laced a snowshoe or two and am interested in sharing the experience with others. I am a student of the children in my life (I am a father of one) and am provided green coupons in exchange for my work as an environmental engineer. I love spending time in our natural environment and am often wandering the woods foraging and sleeping under the stars throughout the year.

We will be making snowshoes from frames that are ready to lace. We will be building our snowshoes from a kit and will certainly learn to recite the golden rule of snowshoe lacing.

Materials Fee:

~\$60/snowshoe kit (frames ready to lace and TechDeck nylon lace with color lacing instructions)

Age limit:

All children over 13 and adults under 13

Suggested requirements for participants:

Storytelling and enough time, patience and perseverance to complete at least one shoe in two days.
